Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is an Election/Restriction Requirement in response to the communication filed June 25, 2001. Claims 1-35 are currently pending in this application.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Claims 11-18, described as the second embodiment in the specification, are drawn toward providing a recommendation to a user using a recommendation model that is formed from data structures and updated ratings data structures.

Species II: Claims 19-26, described as the third embodiment in the specification, are directed to providing a recommendation to a user using a recommendation model that is formed from data structures and then perturbing the recommendation model.

Species III: Claims 27-34, described as the fourth embodiment in the specification, are directed to providing a recommendation to a user using a recommendation model that is formed from data structures and then truncating the recommendation model.

Species IV: Claim 35, described as the fifth embodiment in the specification, is directed to providing a recommendation to a user using a recommendation model that is formed from a cross-set of co-occurrences between two ratings matrices.

Species V: Claim 9 is directed to providing a recommendation to a user using a recommendation model that is formed from banding a sparse ratings matrix and then distributing the banded sparse ratings matrix to computing nodes.

Species VI: Claim 10 is directed to providing a recommendation to a user using a recommendation model that is formed from striping a sparse ratings matrix and then distributing the striped sparse ratings matrix to computing nodes.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-8 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to C. Michelle Colon whose telephone number is 571-272-6727. The examiner can normally be reached Monday – Friday from 8:30am to 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tariq Hafiz, can be reached at 571-272-6729.
